

The **profilter** service / Benefits

Prolaterals' "**profilter**" is a leading edge e-tool providing managed email security services for businesses. Operating at Internet level, we offer industry-leading protection for organizations in the UK, against threats such as spam, viruses and other unwanted content before they reach their networks.

What we deliver:

- Up to 100% clean inbox without viruses, spam or unwanted content
- Email threats combatted and stored away from your network
- A predictable cost that requires no additional hardware, software or updates, delivering low total cost of ownership (TCO)
- Easy and location independent setup and administration
- Service and support with threat monitoring and response
- Dynamic service providing real time protection at time of virus outbreaks
- Added email management services such as email continuity, disaster recovery, email attack and directory harvest protection
- Ability to easily and rapidly deliver future email security services
- Single and multiple user availability
- Customer friendly interface with real time stats
- Online Statistical dashboard
- Set-up within 24 hours of receiving MX or DNS records
- Continuously updated virus and spam comparison directories
- Over 5312 spam rules used and rising
- Multi-stage virus filters for complete virus detection
- Ability to scan compressed (zip) files*
- Scans headers and content
- Ability to identify phishing (scam emails)

Benefits:

- Protects Internet bandwidth and email infrastructure, storage and archiving by reducing email volumes
- Protects internal resources and productivity
- Increased continuity and accessibility of email applications and infrastructure
- Protects and controls users and company image with detection of unacceptable content according to email acceptable usage policies
- Protects and controls against loss of intellectual property, disclosure of confidential information, defamation of company name, abuse of email and protection from potential legal action
- Pop3 & SMTP compatibility
- Price comparable with competitors
- Each account can be honed to the individuals requirement
- No hardware or software installation
- stops bogus virus notification
